

## Tank Weighing Assembly

### FEATURES

- Rated capacities of 50 to 2500 pounds
- Steel or stainless steel construction
- Low profile design
- Trade certified for NTEP Class III: 10000 divisions and Class III: 5000 divisions available in 1000 to 2500 pounds
- Mounts directly to floor or structural support
- Unique neoprene isolation mount accommodates shock/vibration, thermal expansion and load misalignment
- *Sensorgage*™ sealed to IP65/67 standards
- Factory Mutual System Approved for Classes I, II, III; Divisions 1 and 2; Groups A through G. Also, non-incendive ratings (No barriers!)

### APPLICATIONS

- Tank, bin, and hopper weighing
- Batching, blending, and mixing
- Low capacity weighing

### DESCRIPTION

The 65059-TWA is low to mid capacity alloy steel weighing assembly.

This product simply and easily converts any industrial tank, table, or platform into a high accuracy scale. The 65059 weighing assembly is shipped pre-assembled and ready to bolt between the support legs of a platform,

tank, or container and the concrete floor. The top pad of this assembly is constructed from a special stiff neoprene rubber. This pad further simplifies installation by creating a self-leveling system that eliminates the shimming process of the installation. This neoprene pad further benefits the user by creating a vibration dampening effect that helps protect and isolate the load cell. The load cell is available in both nickel-plated and stainless steel construction and sealed to IP67 standards, assuring reliability in industrial and wash down applications. The assembly is available only with zinc plating for corrosion resistance.

This weighing assembly is rated intrinsically safe by the Factory Mutual System (FM); making it suitable for use in potentially explosive environments. This weighing assembly is certified for Legal-for-Trade applications by both American NTEP and International OIML standards.
